Week 3 Slack

I choose Concat and Format, because I can see a usefulness to making things more readable.

Concat adds whatever you want to the field.. In this Case a \$ (Dollar sign).

I then used format , which puts the commas in the numbers in the right spot then 2 decimal places.

image.png ▾

```
1 SELECT *, concat('$',format(OrderTotal, 2)) Total_Format
2 FROM salesorders.orders;
```

OrderNumber	OrderDate	ShipDate	CustomerID	EmployeeID	OrderTotal	Total_Format
1	2012-09-01	2012-09-01	3038	707	12751.85	\$12,751.85
2	2012-09-01	2012-09-03	3001	703	816.00	\$816.00
3	2012-09-01	2012-09-04	3002	707	11912.45	\$11,912.45
4	2012-09-01	2012-09-03	3009	703	6601.73	\$6,601.73
5	2012-09-01	2012-09-01	3024	700	5544.75	\$5,544.75
6	2012-09-01	2012-09-05	3034	702	5820.20	\$5,820.20
7	2012-09-01	2012-09-04	3001	700	407.85	\$407.85
8	2012-09-01	2012-09-01	3002	703	1492.60	\$1,492.60
9	2012-09-01	2012-09-04	3007	700	69.00	\$69.00
